SUMMARY

Spatial Data Science student at the University of Oregon with experience in Esri GIS tools, spatial analysis, and cartographic design. Experienced in working with geospatial to examine environmental, demographic, and urban planning patterns. Interested in applying GIS and remote sensing to environmental issues and community planning.

EDUCATION

University of Oregon **Graduation Expected June 2027**
B.S. Spatial Data Science *Eugene, OR*

- **Relevant coursework**: GIScience, GIS in Urban Planning, Remote Sensing, Cartography, Principles of Data Science, Managing Business Information, Earth Resources, Social Science Research Methods

EXPERIENCE

GIS Peer Consultant **Oct. 2026 - Present**
University of Oregon Data Services *Eugene, OR*

- Provide one-on-one support for GIS coursework and projects, including spatial analysis, geospatial data management, map design, and technical troubleshooting.
- Assist with workshops on introductory GIS and data analysis, helping students develop practical skills and understand geospatial concepts.

Actuarial Intern **June 2025- Sep. 2025**
Pacificsource Health Plans *Springfield, OR*

- Analyzed Medicare health plan claims, enrollment, and cost data using SAS and Excel to identify utilization and financial trends.
- Supported actuarial analyses by cleaning, validating, and organizing large healthcare datasets and preparing results for internal reporting.

PROJECTS

- **Wolverine Denning Habitat Suitability Analysis**

  Used terrain data and raster analysis to identify areas of potential wolverine denning habitat based on slope, aspect, and surrounding terrain.

- **Custom Reference Maps**

  Created three original reference maps of the Willamette Valley, Portland metro area, and downtown Portland, using a consistent visual style to represent different geographic scales without relying on basemaps.

- **2020 Census Choropleth Mapping**

  Visualized the percentage of residents born in their current state of residence across U.S. counties and Oregon census tracts, comparing population patterns across geographic scales.

SKILLS

- **Software:** ArcGIS Pro, ArcGIS Online, QGIS, Excel, Python, SAS
- **GIS & Data Analysis:** Spatial analysis, raster analysis, data cleaning & management, cartographic design, data visualization
- **Professional:** Communication, collaboration, problem-solving, project organization
