SUMMARY

Spatial Data Science student at the University of Oregon with experience using GIS for community, planning, and environmental projects. Detail-oriented and curious, with an interest in using spatial information to better understand real-world questions and communicate findings clearly.

EDUCATION

B.S. Spatial Data Science - University of Oregon

Expected June 2027

Relevant Courses: GIScience, GIS in Urban Planning, Principles of Data Science I-II, Social Science Research Methods, Earth Resources

PROJECTS

- **Elderly Population & Community Access**

Mapped Eugene neighborhoods with higher concentrations of adults 65+ and evaluated access to transit, parks, and community resources.

- **Wolverine Habitat Suitability Analysis**

Used raster reclassification and suitability criteria to identify potential wolverine denning habitat, then evaluated results using terrain and viewshed analysis.

- **Navigation Center Site Selection**

Applied parcel, land-use, and location criteria to identify potential Navigation Center sites, considering transit access, distance from existing services, and surrounding community factors.

PROFESSIONAL EXPERIENCE

Medicare Actuarial Intern - PacificSource Health Plans - Springfield, OR

June 2025 - Sep. 2025

- Analyzed Medicare claims, enrollment, and cost data in SAS and Excel to identify utilization and financial trends.
- Cleaned, validated, and organized large healthcare datasets and prepared analysis results for internal reporting.

Community Ambassador - B.HOM Student Living - Eugene, OR

Dec. 2024 - June 2025

- Managed resident and prospective-resident communications, serving as a point of contact between residents, staff, and the community.
- Created digital materials and co-managed social media content for events, programs, and resident engagement.

SKILLS

- **GIS:** ArcGIS Pro, ArcGIS Online, spatial analysis, raster analysis, cartography
- **Professional:** communication, visual presentation, attention to detail, project organization
